

Info on my eagle project

08/01/08

Hello,

Just to refresh and update everyone on what is going to happen at the project. We will be mulching, trimming plants, planting plants, finishing (applying a preservative) a picnic table, building a picnic table, touching up on rust spots on a banister, and pulling weeds and dead plants.

The materials needed would consist of wheelbarrows, work gloves, snow shovels, trowels, hedge clippers, a portable sander, a 100 ft extension cord, planting shovels, and a pick. Work gloves are mandatory. We will provide water. We will also have free food and snacks!

The project site is The Eastern Montgomery Regional services center off of Briggs Chaney road in Silver Spring. As the date (Aug 30) approaches I will provide directions.

In order to avoid the hottest part of the day we will start early. Be at the project site around 8:00 AM.

YiS,
Ben
